

HOW DO YOU DECIDE IF THE *STORAGE & LOADING GUIDES®* ARE RIGHT FOR YOU?

Unique Metalcraft has put a check list together to help you decide if the Storage and Camper Loading Guides® are for you.

- When you are loading your slide-in truck camper, do you struggle to line it up square to the truck bed?
- Do you realize after you have tied down your slide-in truck camper that it is off center and has created a dangerous un-even weight issue?
- Do you have multiple dents & scratch's in your truck wheel wells, or damaged your truck bed rails?

If you answered yes to any of the above questions then yes, you need the *New Storage & Camper Loading Guides®*!

WHAT ELSE SHOULD YOU KNOW?

If your slide-in camper is not loaded squarely in the bed of your pick-up, you are un-evenly loading each tire, axle and suspension component differently causing pre-mature wear and tear and most importantly your safety is at risk.

CONTRACTOR USES TOO!

- Plywood & Sheet Rock stay put and

allow for tool storage on either side, front or rear!

Current Application List

1999-2008 Ford Super Duty F250-F450 LWB

Here's How The *New Storage And Camper Loading Guides®* Can Help You And Save you Money Too!

We recognize the difficulty in loading a slide-in truck camper straight with the truck bed. We have witnessed the damage caused by the camper contacting the wheel wells and the bed rails so we incorporated a durable roller to guide the camper straight in every time without damaging the truck or camper! The cost of the guides are in many cases less than the insurance deductible to have the truck and camper repaired.

How They Work

- ✓ We utilize the wasted space in front and behind the wheel wells of all full size trucks with these precision laser cut and formed .119" thick cold rolled steel plates and then protect them from the elements with a durable yellow zinc finish.
- ✓ The UHMW roller was designed to help you load your slide-in truck camper the first time! The roller and the guide plates have a special tapered top and bottom edge to minimize the chance of catching the camper floor should it be raised too high while loading.
- ✓ All hardware and fasteners are zinc plated for a truly durable product.
- ✓ Easily store tire chains, battery cables, bags of groceries, trailer hitch ball mounts and tie downs.
- ✓ The guides also provide you with openings to tie down many large items within the pickup bed.
- ✓ Easy to install with a hand drill and simple hand tools in about hour.

Here Is What You Will Receive

- 1- Set Right hand guide plates with UHMW rollers.
- 1 - Set Left hand guide plates with UHMW rollers.
- All the necessary hardware & Grade 5 fasteners.
- Detailed installation instructions.

All At Price You Can Afford

So if you are tired of struggling to load your camper and crawling into your pickup bed to retrieve items you store in the bed of your truck, consider a truly unique solution and try a set of *Storage & Camper Loading Guides®* today!
